The Dangers of Texting and Driving By Kayla Payton

Many State legislatures have been discussing the idea of banning texting while driving. This is due to a high increase in the numbers of people becoming seriously injured or killed. One recent case involved a teenage driver and a 62 year old cyclist. By simply responding “Yes” to a question, the teenager killed an innocent man and changed his future indefinitely. The teen texted his answer “Yes” while driving around a curve and hit the cyclist head on. Because he was 18 years of age, he faced adult homicide charges. He is currently serving 5 years of a 10 year suspended sentence. His decision to text while driving ended a husband, father, and grandfather’s life, and devastated the family that loved him. Although the teen is still alive, his future has been destroyed in many ways. He will never attend the United States Air Force academy, which was his dream.
